Lisa – Take a look at the Upper Animas Mining District web site (<http://www2.epa.gov/region8/upper-animas-mining-district>) and the link to the OSC profile of the Red and Bonita Mine, which has images located there.

This should get you started.

Okay – he's down there I think so I was trying not to bother him. Is there someone else in the office who might be able to help with Upper Animas mining district photo archives?

Richard/Bill:

HQ is asking us for historical photos of the region/GKM area for the website. I spoke briefly to Paula S. and Carol and they are both out for awhile now. Do you know who may have photos from the last 5-10 years?
